## PROFESSIONAL SUMMARY

Business / Systems Analyst who designs, documents, and runs the platforms other people rely on. Owns the full lifecycle: stakeholder requirements, BRD authoring, workflow configuration, data integrity, and live administration. Currently operating a two-application Next.js + Convex ecosystem for an industry partner. Pairs SQL and dashboard fluency (Power BI, Tableau, Streamlit) with a writer's instinct for plain-language documentation and accessible digital services.

## CORE COMPETENCIES

- Platform Administration
- Requirements Elicitation
- BRD / FRD Authoring
- Process Mapping (BPMN)
- SQL & Data Integrity
- Power BI / Tableau
- Workflow Configuration
- Documentation & Training
- Accessibility
- AI-Assisted Efficiency

## RELEVANT EXPERIENCE

**FIIT Co.** Jan 2026 – Present

**Business Analyst & Platform Administrator, Industry Co-op Partnership (George Brown College) · Remote**

- Delivered a live two-application digital ecosystem for FIIT Co.: an internal class management platform (fiit-ops.vercel.app) and a paired public site, built on Next.js 16, TypeScript, and Convex, from requirements through deployment.
- Authored the engagement's BA Report and translated it into working configuration (forms, workflows, and permissions), reducing manual workarounds and keeping applicant-facing processes consistent.
- Maintain data integrity across both apps through a shared Convex backend; produce how-to notes, triage user issues, and build accessibility and plain-language affordances into every release.

**Ralph Lauren** Apr 2024 – Present

**Brand Ambassador (Operations Support) · Vaughan, ON**

- Lifted average transaction value by 10% by analyzing POS data to surface cross-selling opportunities and tailoring customer interactions.
- Supported a 95% customer satisfaction score by identifying 3 recurring service bottlenecks from customer feedback and driving them to resolution.

**Canadian Tire Financial Services** Dec 2023 – Mar 2024

**Sales Consultant · Toronto, ON**

- Reduced processing delays by escalating recurring data quality patterns identified during compliance-validated credit application reviews.

**Kaftan TV** Apr 2021 – Aug 2022

**Reporter & Programme Coordinator · Lagos, Nigeria**

- Improved broadcast operational reliability by 25% by streamlining editorial workflows and coordinating handoffs across technical and production crews under strict deadlines.

## SELECTED PROJECTS

**Customer Support SLA Optimization** [ML + Dashboard](#)

Cost-sensitive Random Forest (0.89 ROC-AUC) predicting SLA breaches; Streamlit "Sniper" dashboard ranks top-50 tickets daily. Projected **\$450K-\$700K** annual savings, **150× ROI**. (Python, Scikit-Learn, Streamlit, Tableau)

**Fraud Detection SQL Pipeline**

Production-style SQL monitoring on PaySim: staging, window-function features, rules-based risk scoring, merchant profiling, and false-positive evaluation. (PostgreSQL / DuckDB)

**Business Analysis & Process Design Portfolio**

BABOK v3 artifacts: BRD, Process Design Document (As-Is / To-Be gap), BPMN swimlane maps, and use case specifications.

## EDUCATION

**PG Cert., Information Systems & Business Analysis, George Brown College** May 2025 – Apr 2026

Dean's List · CGPA 3.8/4 · Honors

**PG Cert., Marketing Management, Digital Media, George Brown College** Aug 2023 – Sep 2024

Dean's List · CGPA 3.7/4 · Honors

**B.Sc., Mass Communication, Mountain Top University, Nigeria** 2017 – 2021

Second Class Upper · CGPA 4.2/5

## TECHNICAL SKILLS

**Business Analysis:** Requirements Elicitation, BRD/FRD, BPMN/UML, UAT, Gap Analysis, BABOK v3

**Data & Analytics:** SQL (PostgreSQL, BigQuery, DuckDB), Python (pandas, scikit-learn), ETL, Statistical Analysis

**Dashboards:** Power BI, Tableau, Streamlit, Excel (Power Query, PivotTables)

**Platforms:** SharePoint, Jira, Confluence, ServiceNow, Power Automate, Convex, Vercel **Web & AI:** Next.js, React, TypeScript, OpenAI GPT-4o, Claude Code
